PROFESSIONAL SUMMARY

UX/CX Designer with 4+ years of experience creating accessible web and enterprise products across healthcare, insurance, pharmaceuticals, cloud SaaS, finance, and automotive. Translate research, Voice-of-Customer inputs, and complex requirements into information architecture, journey maps, user flows, prototypes, WCAG-aligned experiences, and scalable design systems. Partner with product, engineering, design, and global stakeholders in Agile/Scrum teams to deliver intuitive, implementation-ready solutions for complex, regulated environments.

CORE COMPETENCIES

UX/CX & Information Architecture: UX design, interaction design, responsive web design, information architecture, site maps and navigation, user flows, journey mapping, wireframing, prototyping

Research & Insight: User interviews, contextual inquiry, Voice of Customer / user feedback, personas, card sorting, feature prioritization, stakeholder research, competitive analysis, usability testing

Design Systems, Accessibility & Delivery: Design system creation and management, component libraries, variants, pattern documentation and governance, accessibility (A11y), WCAG reviews, Agile/Scrum, sprint planning, design critiques, stakeholder presentations, design QA and developer handoff

Tools & AI: Figma, FigJam, Figma Make, Adobe Creative Suite, Adobe XD, Sketch, Power BI, SAP Build, HTML/CSS; GenAI-assisted research synthesis, ideation, rapid prototyping and documentation

PROFESSIONAL EXPERIENCE

HCLTech | UX Designer

Sep 2022 - Present

Enterprise UX/CX engagements delivered within Agile/Scrum teams for clients in the U.S., Japan, and the Philippines across healthcare, insurance, pharmaceuticals, cloud SaaS, automotive, and finance.

Leading Healthcare Company, USA - Enterprise Website, Design System & Accessibility

- Created and managed a project-level design system aligned with Helix for an enterprise healthcare website, defining reusable components, variants, interaction states, documentation, and governance to improve consistency, accessibility, and scalability.
- Translated research and requirements into responsive, WCAG-aligned web experiences; collaborated with product, design, and engineering through Agile/Scrum delivery, incorporated critique feedback, and completed developer handoff and design QA.

Health Insurance Company, USA - Broker Experience Research & Information Architecture

- Conducted contextual research, market, competitive and stakeholder analysis, and user interviews to identify broker pain points and experience opportunities.
- Used FigJam to synthesize interview findings, facilitate card sorting and feature prioritization, and convert insights into information architecture and user flows for triage, plan comparison, and compliance-aware personalization.

Leading Pharmaceutical Company, USA - GenAI Learning Platform

- Created personas, user journeys, conversational flows, wireframes, and rapid prototypes using Figma and Figma Make; presented design rationale and aligned client, product, and technology teams.
- Designed a GenAI-powered chatbot with intent logic and support journeys, increasing the in-house learning platform's adoption from 30% to 85%.

Leading Pharmaceutical Company, Japan - Disease Insights Dashboard

- Used interviews, personas, and journey mapping to design high-fidelity dashboards for adverse-event severity, dropout prediction, and regional forecasts, turning complex disease data into clear decision support.

Cloud Assessment SaaS Company, USA - Workflow Transformation

- Led research and process re-engineering across 10 departments, eliminated 100% reliance on separate Excel workflows, and created developer-ready web screens that contributed to a 30% improvement in customer experience.

Leading Finance Company, Philippines - Analytics Experience

- Conducted user interviews and designed interactive Power BI dashboards with KPIs, drill-downs, filters, and dynamic charts; produced developer-ready handoff and improved customer experience by 35%.

Leading Automotive Company, USA - SAP Fiori Supply-Chain Transformation

- Mapped user roles and supply-chain workflows during a CMMS-to-SAP Fiori migration; aligned business and user needs, secured stakeholder approval, and delivered experiences that improved usability and supported adoption.

EDUCATION

Indian Institute of Science, Bengaluru - Master of Design, Product Design and Manufacturing

Aug 2020 - Jun 2022

Uttar Pradesh Textile Technology Institute, Kanpur - Bachelor of Technology, Textile Chemistry

Jul 2015 - Jun 2019
