Profile Summary

Product Designer with 4+ years of experience transforming complex enterprise workflows into clear, intuitive, and scalable digital products. I combine user research, systems thinking, and interaction design to uncover high-impact problems, simplify decision-making, and improve usability and efficiency. I collaborate closely with product managers, developers, and designers to translate user insights and business goals into practical, implementation-ready solutions.

Work Experience

HCLTech | UX Designer | Sep 2022 – Present

Leading Automotive Company, USA

- Redesigned supply chain portals by migrating from **CMMS** to **SAP Fiori** using a user-centric approach; aligned workflows with business and user needs to secure stakeholder approval.
- Delivered intuitive **SAP Fiori-based** experiences that improved usability, streamlined supply chain operations, and enhanced system adoption.

Health Insurance Company, USA

- Conducted contextual research, market research, competitive analysis, and stakeholder analysis to build a comprehensive understanding of the domain.
- Led user interviews to identify key pain points and applied research methods including card sorting and feature prioritization, creating user flows to guide solution design.

Leading Healthcare Company, USA

- Redesigned the website using the Helix Design System, ensuring consistency, scalability, and alignment with design standards.
- Improved user experience and visual coherence by applying structured components, typography, and interaction patterns across the platform.

Leading Pharmaceutical Company, USA

- Refined sales consultants' requirements using a user-centric approach, securing client approval after aligning specifications with user needs; created personas, user journeys, and wireframes.
- Delivered a **Gen AI-powered chatbot** solution that boosted adoption of the company's in-house learning platform from 30% to 85%.

Leading Pharmaceutical Company, Japan

- Utilized interviews, user research, personas, and journey mapping to gain a deep understanding of client objectives and user needs, guiding the dashboard design process to align with client goals.
- Developed and implemented dashboards that provide extensive insights into disease-related data, leveraging a comprehensive approach informed by user research and client objectives.

Leading Finance Company, Philippines

- Conducted user interviews and research to understand client goals and user needs. Designed Power BI dashboards with KPIs and data visualizations aligned to requirements.
- Delivered high-fidelity, interactive dashboards (drill-downs, filters, dynamic charts), enabling smooth developer handoff and improving customer experience by 35%.

Education

Indian Institute of Science, Bangalore - Master of Design (Product Design) Aug 2020 - Jun 2022

Uttar Pradesh Textile Technology Institute, Kanpur-Bachelor of Technology(Textile Chemistry) Jul 2015-Jun 2019
